

Connect for Health Colorado Board Public Policy Priorities Approach

October 12, 2015

Essential Question:

How will Connect for Health Colorado (the Marketplace) engage in public policy issues that impact the Marketplace's mission and goals?

Mission:

The mission of Connect for Health Colorado is to increase access, affordability and choice to individuals, families, and small businesses purchasing private health insurance in Colorado.

Goals:

- To create a Health Benefit Marketplace to fit the unique needs of Colorado
- To ensure and maintain financial sustainability of the Marketplace
- To foster and maintain a competitive Marketplace for insurance
- To improve the end to end customer experience, from application to enrollment
- To balance the needs of numerous stakeholders and maintain open and transparent dialogue
- To operate a business where all people, no matter where they live or how much they make, have the opportunity to be healthy and secure.

Background:

The passage of federal healthcare reform (Affordable Care Act, ACA) and our enabling state legislation has laid the foundation for increasing access, affordability and choice for Coloradans purchasing coverage in the individual and small group markets. Our priority now is to make sure we are implementing the ACA appropriately, building upon and/or simplifying its policies, advocating for the needs of our consumers, and proactively educating policymakers and stakeholders about the work and impact of the Marketplace.

Connect for Health Colorado is a public, non-profit entity established by the Colorado General Assembly in 2011 to create a health insurance Marketplace. We opened for business on Oct. 1, 2013, for individuals, families and small employers to compare and buy health insurance and apply for financial assistance in the form of tax credits. Customers can shop online; get help by phone or online chat from Customer Service Center representatives; and access in-person assistance from a network of certified Brokers, community-based Health Coverage Guides or Application Counselors. In 2014 and 2015, we enrolled more than 200,000 Coloradans in private insurance, helped nearly 100,000 gain access to tax

credits that lowered their monthly costs, and tens of thousands more by providing access and support for Medicaid and Child Health Plan *Plus* insurance.

Connect for Health Colorado serves a critical role as the only venue for Coloradans purchasing individual market coverage to receive help paying down their monthly premiums and out of pocket expenses. We also provide Coloradans with a marketplace to shop and compare plans from different insurance companies, side-by-side, and to check to see if their doctor, hospital, or prescription drug is covered before purchasing.

Structured by our mission and goals, this document will be used by Connect for Health Colorado staff and Board Members as a guide to address public policy that may impact the Marketplace and our consumers.

Public Policy Priorities:

Connect for Health Colorado supports Policy issues that:

- Support state based marketplaces and individual and small group insurance market competition
- Support sustainable financing of the Marketplace
- Support meaningful health reforms that aim to transform the health insurance market, reduce healthcare costs, and make Colorado the healthiest state in the country
- Promote maximum flexibility to allow for tailored solutions
- Increase access to coverage, particularly in rural communities, underserved and disadvantaged populations, and young adults
- Promote lower cost-sharing requirements so customers can afford to access needed services and prescription drugs
- Support access to quality healthcare services in compliance with federal and state regulations
- Support reliable and timely access to Insurance Affordability Programs (Medicaid/CHP+/APTC/CSR) and minimize disruptions in enrollment
- Promote transparency of health care costs and services including increased access to information that will empower and educate consumers to make informed purchasing decisions
- Promote meaningful choice that allows consumers to make true apples-to-apples comparisons

Connect for Health Colorado may take a position on or propose changes to public policy issues that align with our mission, goals, and the above priorities. Board of Directors and the Chief Executive Officer will discuss policies that impact the Marketplace as needed. Depending on the policy, coordination with government affairs consultants and state entities may be appropriate. Support of a policy will be made public, but the manner in which it is delivered may vary depending on the specific circumstance (i.e. full Board Meeting, newsletter, Committee Meeting, etc.).
