

Sample Bond Investment Language

Non-government bond investments will consist solely of taxable, fixed income securities that have an investment-grade rating (AA or higher by Standard & Poor's and Aa2 or higher by Moody's) that possess a liquid secondary market. If the average credit quality rating disagrees among the two rating agencies, then use the lower of the two as a guideline.

No more than 5% of the fixed income portfolio will be invested in corporate bonds of the same issuer. As well, not more than 20% of the fixed income portfolio will be invested in bonds of issuers in the same industry. Total invested in non-government bonds should not exceed X%.

Prohibited securities include: private placements, derivatives (other than floating-rate coupon bonds), margined transactions and foreign denominated bonds.

Exceptions to the prohibited investment policy may be made only when assets are invested in a Mutual Fund(s) that periodically utilizes prohibited strategies to mitigate risk and enhance return.
