ORACLE SUPPORT CONTRACT

October 10, 2016

An Oracle contract was signed within parameters agreed with the board

- License covers physical and virtual infrastructure
  - At least 25-50% room for growth in use of virtual licenses
  - If enrollment were to grow by more than 100%, we *may* need to consider additional Oracle licenses
  - Effectively the same limitations as would be imposed by existing agreement in March 2017
  - Oracle Identity Manager (single-sign on) moves to a per-processor model
- Requires some CGI effort to consolidate test databases within 12 months
- Attention to detail around fine print (# named users, disaster recovery environment, processor language)

Key points:
- Savings in this/next fiscal year of >$500k (including technical changes)
- Savings in following years of >$1.3M annually
- 2-year commitment
- Price hold on Oracle products for 2 years
