

## Broker Fees

**Beginning** August 8, 2018, brokers in Colorado will be permitted to charge a fee for advising customers on the choice of a health plan if the broker:

- Will not receive a commission on the plan from the health insurance company
- Provides a written disclosure to the customer

**Brokers** have played an important role in assisting our customers throughout our history and we expect that to continue.

Some points to be aware of:

- The Colorado Division of Insurance will develop rules to implement the new law
- No fee can be charged in connection with an enrollment in Medicaid or CHP+
- Connect for Health Colorado will continue to inform our customers on the full cost of their coverage and we will incorporate this change in future communications
- This change applies to health plans sold in or outside the Connect for Health Colorado Marketplace for brokers who choose to charge a fee
