

Application and Shopping Experience

*Connect for Health Colorado Board meeting
May 13, 2013*

Development of Application

- CMS guidance—proposed data elements released in December 2012 and updated guidance released again in January and April 2013 for online and paper
- If Colorado wants to make any changes to the proposed application we have to get approval from CMS
- We have worked for several months with our partners, DOI and HCPF, to achieve alignment and also gather comments on how the application could be improved from our stakeholders
- We have identified some areas where the application could be improved with our partners and plan to submit our proposal to CMS for review and approval
