# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

Cigna Health and Life Insurance Company 49375-CO-EPO

Total Number of Completed Surveys: 179

Survey Response Rate: 16.9%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

Rocky Mountain HMO 97879-CO-HMO

Total Number of Completed Surveys: 131

Survey Response Rate: 15.5%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

HMO Colorado, Inc. 76680-CO-HMO

Total Number of Completed Surveys: 150

Survey Response Rate: 15.6%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

Denver Health Medical Plan, Inc 66699-CO-HMO

Total Number of Completed Surveys: 100

Survey Response Rate: 15.4%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

## **Scoring Questions**

### Final Disposition Breakdown

| Final Disposition                   | National-Level Breakdown N(%) | Unit-Level Breakdown N(%) |
|-------------------------------------|-------------------------------|---------------------------|
| Completed Surveys                   | 51,935 (11.60%)               | 100 (10.68%)              |
| Web                                 | 17,937 (4.01%)                | 45 (4.81%)                |
| Mail                                | 24,957 (5.57%)                | 39 (4.17%)                |
| Telephone                           | 9,041 (2.02%)                 | 16 (1.71%)                |
| Ineligible Enrollees                | 4,304 (0.96%)                 | 12 (1.28%)                |
| Deceased                            | 210 (0.05%)                   | 1 (0.11%)                 |
| Not Eligible                        | 4,094 (0.91%)                 | 11 (1.18%)                |
| Non-Respondents                     | 391,612 (87.44%)              | 824 (88.03%)              |
| Refusal                             | 23,448 (5.24%)                | 43 (4.59%)                |
| No Response After Maximum Attempts  | 361,025 (80.61%)              | 769 (82.16%)              |
| Bad Address or Bad Telephone Number | 1,307 (0.29%)                 | 0 (0.00%)                 |
| Other Non-Respondents               | 5,832 (1.30%)                 | 12 (1.28%)                |
| Total Enrollees                     | 447,851 (100%)                | 936 (100%)                |

# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

Friday Health Plans of Colorado, Inc. 63312-CO-HMO

Total Number of Completed Surveys: 87

Survey Response Rate: 12.3%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

## **Scoring Questions**

|   | Your Score Reliability Breakdown by Response Types |                                 |                               |                              |                    | Types n (%)                  |                         |                                       |                          |                |  |              |                    |

# 2023 Enrollee Qualified Health Plan (QHP) Enrollee Experience Survey Results

Kaiser Foundation Health Plan of Colo. 21032-CO-HMO

Total Number of Completed Surveys: 238

Survey Response Rate: 20.0%

### This report contains summary results for:

- Scoring Questions: Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for the following areas: Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.
- Screener Questions: These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic to get health care for yourself?" Screener questions are not scored.
- About-the-Enrollee Questions: These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.
- Survey Disposition: This section reports general survey administration statistics, such as response rates and breakdown of responses by Mail, Phone, and Internet survey modes.

#### **Notes:**

- Beginning with the 2021 QHP Enrollee Experience Survey (EES), CMS added two questions (Q17 and Q21) regarding access to care and telehealth services during the SARS-CoV-2 public health emergency, and updated care settings to include telehealth options. In light of the ongoing public health emergency, these changes have been retained for the 2022 QHP Enrollee Survey.
- Beginning with the 2022 QHP EES, CMS added the "Other" response option to the enrollee sex question for the Phone mode only.
- Individual response counts to Race (Q68) and Help (Q70) questions may add up to exceed Total Responses, as respondents can select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using standard definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing and/or usable responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys fielded according to the sampling frame.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.
