[REDACTED]

To:
Connect for Health Colorado (C4HCO) Board of Directors

Shouldn't the managers and executives of C4HCO provide more transparent and complete health coverage data to C4HCO board and to the public, before they put Marketing Spending Plans on the agenda?

Should the Board and people also know, for example, how many Colorado residents lost their health coverage last year? How many lost their coverage only because C4HCO executives did not implemented provision in SB20-215 to **Establish a Path for Consistent Coverage for Individuals? (CRS 10-16-1202 (1)(d)(V))** What's going to happen to those who had to interrupt their medical care because of lost of coverage and/or who is going to pay the medical bills of those newly uninsured?

How many more uninsured individuals are there in Colorado now, thanks to the dysfunctional immigration policy and thanks to C4HCO marketing campaigns to provide free health insurance and public benefits to unlawfully present migrants?

Thank you for considering,

Daniela Gosselova
